

Experiences with PC-AXIS, Statistics Denmark 2007 PC-AXIS reference group meeting, 5-7 September, Helsinki

Central parts involving PC-AXIS

- The SumDatabase is used for data storage and internal use. (PC-AXIS sql 2003, Macro database model ver 2.0)
- Publications on the basis of px-files and files from the SumDatabase (PX-PUBL)
- StatBank is the public, free of charge database. It contains all official statistics and data is released 9:30 AM every day. User interface developed by Statistics Denmark. (PX-iMap, PX-iGraph, dll:s for file conversion, pivot, ...)
- StatHost has a StatBank like interface for external customers, data stored in SumDatabase (like StatBank + PX-WEB + PX-MAKE)
- Exchange of data with international organisations (PC-AXIS Gesmes converter, testing to SDMX)

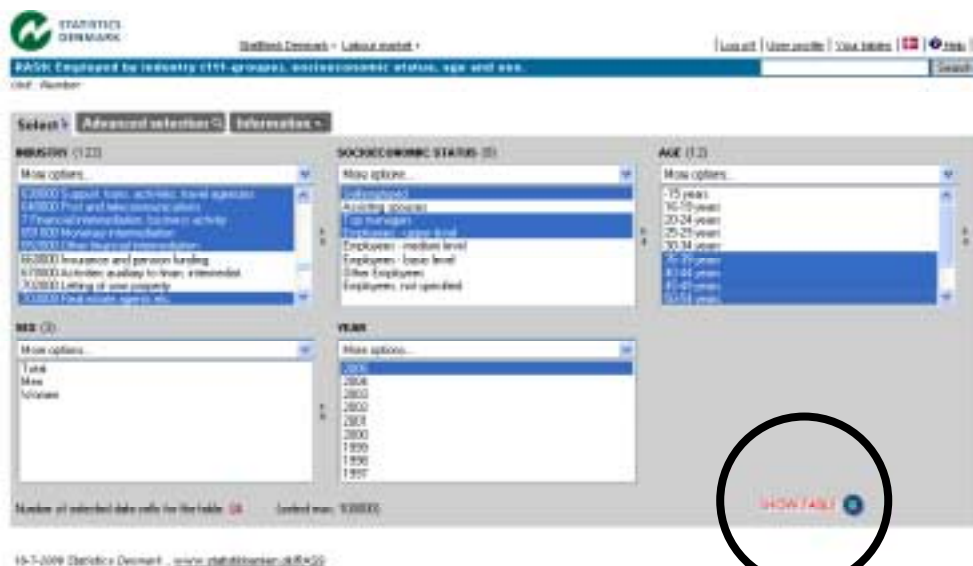

Developments since 2006

Updates in PX-MAKE: none.

Updates in PX-iGraph: no change

Download formats and use of graphs and maps by external users.

	2003	2004	2005	2006	2007 estimated
Total retrievals (clicks on Show table)	1,086,478	1,273,185	1,624,205	1,804,831	1,900,000
Download formats total	354,164	552,727	1,218,504	609,715	617,000
PC-Axis	34,534	37,293	38,863	35,186	30,000
Excel	219,609	250,945	306,834	354,168	370,000
Text	3,420	3,861	4,113	4,154	4,500
DBase	4,361	5,274	6,145	5,478	3,000
DBase in rows	2,440	2,783	3,166	3,294	2,500
Semicolon separated values	1,469	2,462	2,568	2,292	2,000
Tabulator separated values	1,075	1,178	1,473	1,423	2,000
Comma separated values	1,037	1,237	1,876	2,203	2,000
SAS	2,650	3,525	3,852	3,105	2,000
Matrix csv	1,051	1,171	1,643	1,591	1,500
Text matrix	1,465	1,723	1,673	1,646	1,500
Time series for Aremos	929	853	1,783	1,699	1,500
Time series batch	0	369	13,430	26,292	28,500
XML ¹	0	183,184	830,685	167,137	166,000
Tables- Key figures	80,124	56,869	400	47	0
Graphs total	66	43,619	260,862	326,826	430,000
Maps	60,454	86,115	86,630	82,993	80,000

¹ The XML file format is used to produce automatic updates on the web via web services. The decrease in download of XML files is explained by the fact that XML files from 2006 are being cached. This means the same retrieval is only created once.

StatHost	PX-WEB
regionsjaelland.statistikbank.dk	http://www.orestat.scb.se/website/index.aspx
mediesekretariatet.statistikbank.dk	RealEstate Denmark

nationalbanken.statistikbank.dk	

Training courses during the last year:

PC-AXIS: 4 full day courses incl PX-MAP

StatBank: 5 full day courses

PX-MAKE: 1 half day course

PX-PUBL use

50 per cent of all tables in the Statistical Yearbook are made in PX-PUBL

80 per cent of all tables in Ten-year review are made in PX-PUBL

Several statistical abstracts are also produced in PX-PUBL

PX-MAP

PX-MAP is used with the StatBank and PC-AXIS

PX-MAP 2 is not installed. Still considerations regarding the need for users to install SVG reader.

Decimal rounding

PC-AXIS uses the Banking rule when rounding:

2.5=2

3.5=4

Since August the StatBank rounding now uses the “traditional “method also used by Excel:

2,5=3

3,5=4
