

Register-based Social Statistics

Marianne Johnson

Finnish Information Centre for Register Research
National Research and Development Centre for Welfare and Health

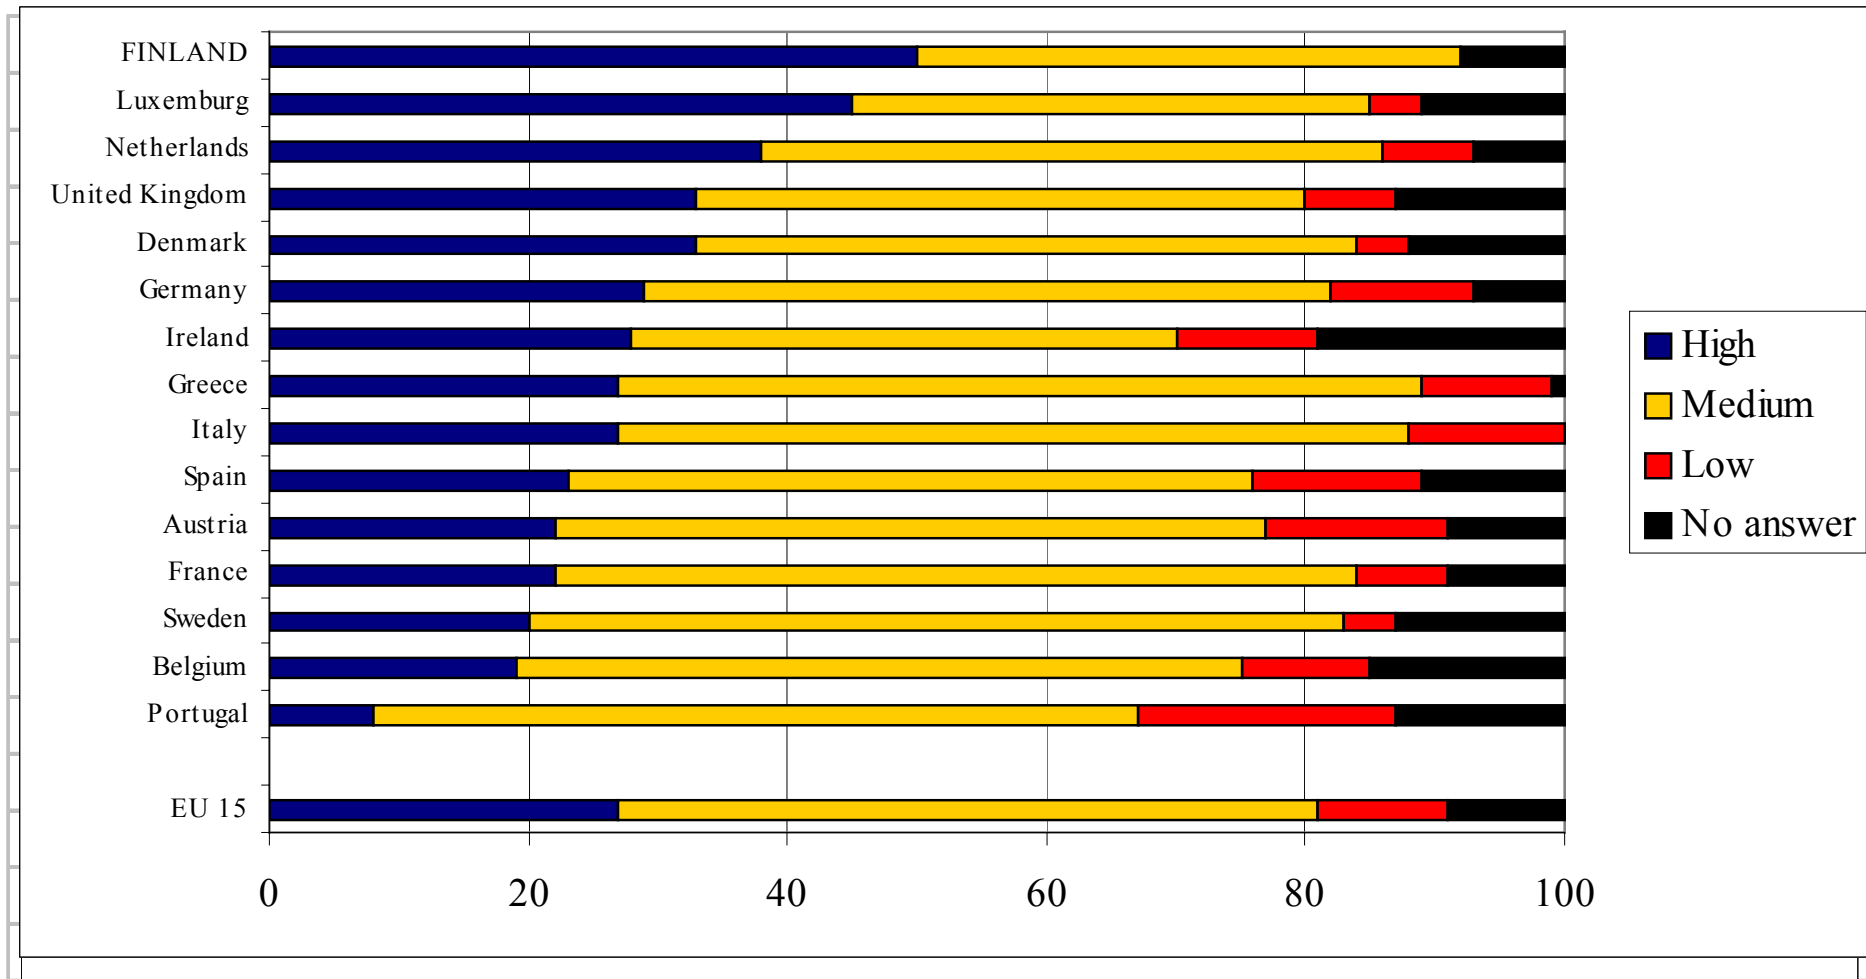

Interesting topics:

- Use of registers or surveys?
 - Carsten Olsson: In the future, it is possible the approach will lean towards more use of survey information !!!!
 - Number of unemployed in the LFS and the register of job seekers
 - >Can we find a way of using the best parts from both?
 - Minimizing the answering burden in surveys
 - >Can 'surveys' be totally register answered?
 - What kind of allowances can be made?
(e.g. missing register data for specific questions)
 - Will the availability of suitable registers dictate what kind of statistics will be compiled?

Interesting topics (cont):

- Complete registers make Flow statistics possible
 - Flow statistics vs. panel surveys
 - Similar flow statistics for the unemployed as for students
 - > Could flow statistics be used when compiling labour market policy data?
- What does legislation allow us to do?
 - Use of PIN
 - Right to get access to all administrative registers for NSI
 - Administrating big data sets
 - >Can the register data compiled for statistical also be used by researchers

Do you feel that the level of the data protection legislation in your country is....?
