The reported annual changes in trade sales and sales volumes are not seasonally or trading day adjusted, which means that the effects of public holidays are not considered. The opening hours of retail shops were deregulated starting from 1 January 2016, after which some retail shops have extended their opening hours.

According to the Structural business and financial statement statistics, daily consumer goods accounted for 48.9 per cent of turnover in retail trade in 2014.

The retail trade flash estimate is based on a sample covering, on the average, 60 per cent of retail trade turnover. Data on trade sales by industry will next be released on 15 November 2016.

Flash estimates on retail trade are published at a lag of just under one month from the end of the statistical reference month. The preliminary data on motor vehicle, wholesale and retail trade based on a larger sample will be published at a lag of roughly six weeks from the end of the statistical reference month and the revised data based on total data are published at a lag of roughly ten weeks.
