

# Goods Transport by Road

2015, 3rd quarter

## Volume of goods transported by lorries grew in the third quarter of 2015

A total of 81 million tonnes of goods were transported by lorries in the third quarter of 2015, which was four per cent more than in the corresponding quarter of 2014. The volume of transported soil materials decreased by eight per cent and the volume of transport for other goods increased by 16 per cent compared to the corresponding quarter of the previous year. These data derive from the statistics on goods transport by road compiled by Statistics Finland.

### Quarterly volume of goods transported by lorries in domestic transport

The total transport volume of lorries amounted to 6.0 billion tonne-kilometres in the third quarter of 2015, which was 14 per cent more than in the corresponding quarter of one year before. Ninety-four per cent of the transport volume was transported in professional transport and six per cent in private transport.

The data for the statistics on goods transport by road are collected from lorry owners with a quarterly sample survey. Transported volume of goods refers to the weight of goods loaded on lorries in tonnes.

Tonne-kilometre describes the volume of transport and is obtained as a product of transported volume of goods and length of transport journey.
