Turnover estimate of large enterprises

2020, April

Turnover of large enterprises contracted in April

According to Statistics Finland's preliminary data, the seasonally adjusted turnover of large enterprises contracted by 7.2 per cent in April 2020 compared with March. In March, seasonally adjusted turnover fell by 0.9 per cent, while in February, turnover was 0.6 per cent lower than in the month before. The exceptional situation caused by coronavirus had an effect on the development of large enterprises.

Seasonally adjusted change in the turnover of large enterprises from the previous month, %

The unadjusted turnover of large enterprises fell by 11.2 per cent in April 2020 compared with April 2019. The turnover of large enterprises decreased by 4.9 per cent in January to April from one year ago.

Source: Statistics Finland

The turnover estimate of large enterprises is based on a sample formed of 2,000 enterprises with the most significant turnover in manufacturing, construction, trade and other service industries. Excluded from the statistics are enterprises engaged in primary production, and bank and insurance activities.

The enterprises described in the statistics make up approximately 70 per cent of the turnover of all enterprises operating in Finland, represent more than one-half of the investments made and employ good 40 per cent of the personnel of all enterprises.

The data can be used for short-term monitoring of development in business activities and the market. The economic situation of the whole enterprise sector cannot be assessed solely based on these statistics, because the economic development of smaller enterprises may differ from large enterprises.

More detailed data on the development of various industries are published monthly on the home pages of business trend indicators.
