

# Index of turnover in industry

2010, July

## Turnover in manufacturing grew by nearly 13 per cent in May to July from the year before

According to Statistics Finland, in the May to July period of 2010 turnover in manufacturing was 12.8 per cent higher than in the corresponding period of the year before. Domestic sales grew by 10.9 per cent and export turnover by 14.3 per cent from one year ago.

### Annual change in turnover in selected manufacturing industries during 5–7/2010, % (TOL 2008)

Source: Statistics Finland

Turnover went up from the corresponding period of the previous year in nearly all sub-industries. The largest growths were seen in the forest industry (33.3%), in mining and quarrying (31.5%) and in water supply, sewerage and waste management (28.1%). In the electronic and electrical industry turnover was almost unchanged from the previous year (-0.1%).

The index of turnover in industry describes enterprises whose main industry is manufacturing. The calculation of the indices is based on the Tax Administration's value added tax data which are supplemented with data obtained with Statistics Finland's sales inquiry. The monthly turnovers of manufacturing enterprises can vary considerably, especially in the metal industries. The variation is mainly due to invoicing practices. The final invoice for major machinery deliveries and projects may be recorded in the sales of one month, even if the delivery had required the work of several months or years.
