

Enabling CRAN mirror repository on RStudio

Cran mirror repository can be found at the URL <https://cran.isaacus.local/>

1. Remove `.Renvironment` -file under your Documents folder. Or edit `.Renvironment` -file and remove following lines:

```
RSTUDIO_DISABLE_PACKAGES=TRUE  
R_LIBS_USER=N:/
```

2. Create `.Rprofile` -file under your Documents folder with lines below

```
local({  
  r <- getOption("repos")  
  r["CRAN"] <- "https://cran.isaacus.local/"  
  options(repos = r)  
})
```

`.Rprofile` -file can also copied from D:\ -network drive.

3. Close and start RStudio application

You can install R packages with `install.packages ("PACKAGE")` -command. If you want to install packages via graphical user interface, take these steps:

1. Choose Tools ► Install Package
2. Search Packages
3. Select Install dependencies
4. Click Install -button

After a package is installed, use the `library()` function to load package.
