

Pricing of research data and services

The prices are in force in 2021. The prices are exclusive of value added tax (24%).

Service prices

The compiling and editing of research data are priced at an hourly rate according to the number of hours worked. IT costs related to the assignment are added to the labour costs.

Service	Price
User licence including one hour of preparatory work	
<ul style="list-style-type: none">•The cost for processing the application will be invoiced regardless of whether the application is approved or not•An application that is canceled or that is not completed after handling of it has started, is invoiced according to the amount of work performed	EUR 500
Charge for hour worked	EUR 105 per hour
Expansion/continuation of user licence	EUR 500
Division of invoice to several organisations	EUR 105
Renting of a Research Laboratory workstation	EUR 70 per day
Re-opening remote access for the research project after closing	EUR 350

Ready-made datasets

The price of ready-made datasets is based on maintaining the data and the amount of work of the customer service related to the dataset.

Remote access use 2021

A research project-specific use charge is paid for remote access use including both the use charge for remote access use and opening and maintenance fees. This agreement will remain valid until further notice. The research project selects a suitable virtual machine for its use.

Prices per virtual machine

Virtual machine	Price
S (8 GB RAM, 4 cores)	EUR 2,250 per year
M (16 GB RAM, 6 cores)	EUR 2,750 per year
L (32 GB RAM, 8 cores)	EUR 3,500 per year
XL (64 GB RAM, 8 cores)	EUR 4,800 per year

The remote access charges are invoiced twice a year, the invoicing period is six months: the use between January and June is charged in June and the use between July and December is charged in December.

If the virtual machine changes during the invoicing period, the use charge is for the biggest virtual machine used.

The minimum length for the invoicing is one invoicing period (January to June / July to December). Hence, the minimum charge is a six-month share of the annual charge. If the use of the remote-access starts or ends in the middle of the invoicing period, the charge will be set in proportion to the monthly level according to the start and end times provided that the use has continued for at least one whole invoicing period.

Other remote access costs

A limited amount of disk space is reserved for each research project, additional disk space is charged for separately. The price for additional space is EUR 120 per 200 GB a year. The price includes the opening charge for the first year.

Data costs are invoiced in accordance with the price list of research data.
