

# Trend Indicator of Output

2020, February

## Output of the national economy grew in February

Adjusted for working days, industrial output went up by 1.0 per cent in February 2020 from one year back. In February, seasonally adjusted output, in turn, grew by 0.4 per cent from the month before. According to revised data, working day adjusted output grew in January 2020 by 1.4 per cent (previously 1.7 per cent) from January 2019.

### Volume of total output 2005 to 2020, trend and seasonally adjusted series

The series of the Trend Indicator of Output are seasonally adjusted with the Tramo/Seats method. The latest observations of the series adjusted for seasonal and random variation (seasonally adjusted and trend series) become revised with new observations in seasonal adjustment methods. Revisions especially at turning points of economic trends may be significant, which should be taken into consideration when using seasonally adjusted and trend data.

**Working day adjusted change of total output from previous year's corresponding month, %**

Working day adjusted primary production fell by around 11 per cent from the year before. Secondary production increased by around one per cent and services by around one per cent from February 2019.

Primary production refers to agriculture, hunting, forestry and fishing. Secondary production includes manufacturing and construction. Services comprise trade, hotel and restaurant activities, transport and business activities, as well as real estate, renting and research services, financial intermediation and insurance, and public services.
