Turnover in service industries

2021, August

Preliminary data: Turnover in services grew in August

According to Statistics Finland’s preliminary data, the working day adjusted turnover in service industries grew by 8.9 per cent in August 2021 compared with August 2020. The development was partly due to the exceptional situation caused by the coronavirus one year earlier. Services are here examined exclusive of trade.

Annual change in working day adjusted turnover of service industries, %

Turnover fell from the previous month

According to the preliminary data the seasonally adjusted turnover in service industries fell in August 2021 by 0.8 per cent compared to July. In July, seasonally adjusted turnover grew by 0.5 per cent, while in June, turnover was 1.3 per cent higher than in the month before.
Change in seasonally adjusted turnover from the previous month of service industries, %

The data for the latest month are preliminary and are released at a delay of around four weeks. The data may become significantly revised in coming months.

The factors caused by the variation in the number of weekdays are taken into account in adjustment for working days. This means taking into consideration the lengths of months, different weekdays and holidays. In addition, seasonal variation is eliminated from seasonally adjusted series, on account of which it makes sense to compare observations of two successive months as well.
