New orders in manufacturing

2013, September

New orders in manufacturing went down by 3.3 *per cent year-on-year in September*

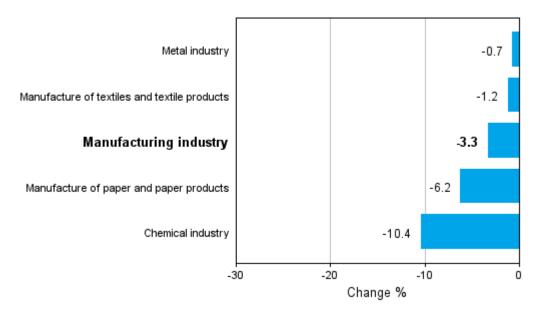

According to Statistics Finland, the value of new orders in manufacturing was 3.3 per cent lower in September 2013 than twelve months earlier. In the January to September period, new orders decreased by 6.1 per cent year-on-year.

Change in new orders in manufacturing from corresponding month of the previous year (original series), % (TOL 2008)

Among the examined main industries, new orders decreased most in the chemical industry, where new orders went down by 10.4 per cent from the previous year. The fall recorded in the manufacture of paper, and paper and board products was 6.2 per cent and in the textile industry 1.2 per cent compared with September 2012. In the metal industry, the volume of new orders was nearly on level with the year before.

When interpreting these statistics it should be borne in mind that they typically show strong fluctuations by month. Even new orders of substantial value are not examined over extended time periods but for the statistical reference month only.

Change in new orders in manufacturing 9/2012-9/2013 (TOL 2008)

The index of new orders in manufacturing describes development in the value of new orders received by enterprises for commodities and services that are meant to be produced by establishments located in Finland. These statistics are based on non-probability sampling, in which the basic observation unit is an enterprise or a kind-of-activity unit. The sample comprises monthly 400 to 450 enterprises or their kind-of-activity units. Index point figures and annual change percentages are published monthly for five industry categories. The time series start from January 2005 and their base year is 2010 (2010=100). A detailed description of the statistics and the calculation method are included in the quality description on the home page of the statistics.
