

Index of turnover in industry

2016, September

Turnover in manufacturing grew by 2.3 per cent in the third quarter

According to Statistics Finland, turnover in manufacturing in the July to September period was 2.3 per cent higher than in the corresponding period of the year before. Domestic sales grew by 2.0 per cent and export turnover by 2.5 per cent from one year ago.

Three months' year-on-year change in turnover in manufacturing (C) sub-industries (TOL 2008)

Source: Statistics Finland

Turnover went up from the corresponding period of the previous year in nearly all **manufacturing (C) sub-industries**. Turnover grew most in the electrical and electronics industry, by 5.5 per cent, and in the forest and metal industries, by 4.2 per cent. Less turnover than in the previous year was generated in the food industry, 1.6 per cent and in the chemical industry, 1.8 per cent.

Three months' year-on-year change in turnover in main industrial categories (TOL 2008)

Source: Statistics Finland

In the **main categories of other industries**, turnover in mining and quarrying increased by 10.5 per cent, and in water supply, sewerage, waste management and remediation activities by 2.2 per cent from one year before. Turnover contracted from the previous year by 4.2 per cent in electricity, gas, steam and air conditioning supply.

The index of turnover in industry describes enterprises whose main industry is manufacturing. The calculation of the indices is based on the Tax Administration's value added tax data which are supplemented with data obtained with Statistics Finland's sales inquiry. The monthly turnovers of manufacturing enterprises can vary considerably, especially in the metal industries. The variation is mainly due to invoicing practices. The final invoice for major machinery deliveries and projects may be recorded in the sales of one month, even if the delivery had required the work of several months or years.
